...building our way to the future ...

OVERVIEW

AGR Tools, Inc. (AGR) is a Texas corporation (C Corp) in good standing with the State of Texas. AGR is in the business of distributing more than seven hundred products through a dealer network to the professional construction, building, maintenance and demolition industries. The company is on a continuous expansion plan to capture a large percentage of this market by increasing its stocking dealerships. AGR currently has 18 distribution centres located in 16 States and 2 in Canada. In the development plan AGR expects to capture a minimum of 20% of the entire market within 5 years in the USA and Canada. With a qualified management, technical and financial team, AGR is out to take advantage of the opportunities that are viable and has positioned itself to capture and service the marketplace.

THE MARKET

After a 4 year Beta testing program, the original investigation into the manufacturers and distributors of similar tools and products, which our facilities in China have been producing for more than 20 years, it became obvious that the market in the United States was a prime source for the unfettered growth for the Companies products. AGR has developed several tools that are exclusive and have no competition. The industry has long awaited a supplier with the skill set, forward thinking and design capabilities of AGR. AGR expects to develop a minimum of \$250,000,000.00 in annual customer re-order base and new order business sales within the next 10 years.

AGR HIGHLIGHTS

- AGR along with its affiliates are distributors of high quality diamond based tools and accessories. The future of the business is guaranteed because of population expansion growth of new and re-modeling construction.
- The Company has many unique one of a kind products that has changed the industries that it services.
- The business model being used (stocking dealers) has proven successful in every area because of the unique combination of products, quality and service.
- Strong management team.

TECHNOLOGY

AGR has retained highly qualified IT personnel who have developed a fully operational stocking dealer e-mail system and intranet communication for all stocking dealers. The Company is in the process of developing a comprehensive on line shopping cart and software to develop and expand referral sales, and re-orders.

THE STIMULUS BILL

AGR Dealers are poised to reap huge profits from the hundreds of billions of dollars in infrastructure spending.

The Bill will offer all of AGR's distribution centers the ability to maintain the products that are in most demand for all designated regions in America and Canada. The new stimulus plan proposed by the Obama administration is focused on the most demanded products that AGR either manufactures or distributes. The \$87 billion that is included in the first portion of the stimulus plan will give AGR the opportunity as the only publicly traded company in this sector of the industry to capture a large portion of the market of specific tooling needed for road, bridge, demolition and building infrastructure.

As long as people build or demolish, they will have to buy the types of products that AGR distributes. Without AGR's products, 90% of construction would not be possible.

USA/CANADA DISTRIBUTION CENTERS

18 Distribution Centres are Located in:
16 States and
2 in Canada

Risk factors could include:

The Company depends on its management team to develop its growth in Stocking Dealers throughout the USA and Canada. Market conditions could affect the timing and success of the entire expansion plan. To date, growth of the company's distribution centers has not been effected by the current downturn in the economy due the continuing development of Stocking Dealers.
